

# Blaupunkt ceramic, induction & gas cooktop care.

---

## For maintenance we advise:

- Wipe down the surface after each use with a soft cloth or sponge to prevent food residues from hardening.
- Go over the surfaces with a damp cloth to help prevent grease and food debris from building up.
- Tackle any stains or spills immediately, once the stove top surface has cooled.
- Clean your cookware regularly before placing it on your cooktop. A build-up of grease can leave aluminum-looking rings or marks on a cooktop. These are often very difficult to clean.

---

## Please avoid the following treatments:

- Using scrape or sandpaper sponges
- Using a knife to remove stains
- Using soap or detergent containing scouring sand
- Using concentrated detergents
- Using aggressive chemical products Ph<7 or Ph>7
- Using any other aggressive or abrasive product
